SUMMARY

Driven, creative, and adaptable software engineer. Recently graduated from CU Boulder in May 2026 with a BA in Computer Science and a minor in Music. Currently a Robotics Engineering Intern at Lunar Outpost; previously at Axiom Space and Lunar Outpost developing mission-control software solutions. Passionate student of robotics and intelligent systems and experienced in industry-grade full-stack and UI/UX development. Self-taught graphic designer and an ardent musician and artist.

EDUCATION

UNIVERSITY OF COLORADO BOULDER — BA in Computer Science — Minor in Music — *(Graduated May 2026)*

Coursework: Advanced Robotics, Computer Vision, Network Systems, Data Science, Programming Languages, Cybersecurity, Operating Systems, Algorithms, Software Dev Methods, Numerical Computation, Linear Algebra, Astronomy II, Physics II.

SKILLS

Programming Languages

Python TS/JS C/C++ Scala
Julia Rust LaTeX HTML/CSS

Technologies

ROS2 OpenCV YOLO AI
React.js Node.js SQL Postgres
GitHub Docker AWS Linux
Kubernetes CI/CD DevOps

Design & Other

Photoshop Illustrator Figma
UI/UX Excel Word PowerPoint
Ableton

HONORS & AWARDS

Community Impact Award
CU College of Engineering &
Applied Science — 2026

Culture Impact Award
CU College of Engineering &
Applied Science — 2026

PROJECTS

EXPENSE SHARE — *(Spring 2024)*

🐙 GITHUB — Team Project

- Built a web app to calculate shared expenses using OCR for receipt scanning.
- Managed Agile workflow and SCRUM meetings.

WORK EXPERIENCE

ROBOTICS ENGINEERING INTERN — *(Jun 2026 - Dec 2026)*

LUNAR OUTPOST — Golden, CO

- Developed, tested and integrated GNC, Core, and Ground software for the NASA LTV program, contributing to an end-to-end integration demo for the NASA Moon-base Director & leadership.
- Architected the software stack for RC MAPP; created hardware drivers, interfaces, and ROS2 nodes.
- Implemented a compile-time composition framework for combining heterogeneous dynamic systems with automatic routing logic, using C++ templating.
- Designed the official LV2 mission patch using Adobe Illustrator.

UI/UX SOFTWARE ENGINEERING INTERN — *(Jun 2025 - Aug 2025)*

AXIOM SPACE — Houston, TX

- Led UI/UX research, design, & development for a new mission-control app.
- Created user flows and high-fidelity wireframes in Figma.
- Built the app with React from these designs with database-backed persistence.

SOFTWARE ENGINEERING INTERN — *(Jun 2023 - Aug 2024)*

LUNAR OUTPOST — Golden, CO

- Developed features for LO's mission-control software, Stargate.
- Implemented automation tools for dashboards, command dispatch, and log parsing.
- Worked within a microservice architecture using Kubernetes and AWS.

LEADERSHIP & ACTIVITIES

CU WOMEN IN COMPUTING — *(Aug 2024 - May 2026)*

VICE PRESIDENT (2025-2026), MEMBER (2024-2025) — Boulder, CO

- Lead meetings, fundraisers, and professional development events.
- Overhauled the club's branding with a new logo, original merch designs, and a new standalone website.

CU ROVER TEAM — *(Aug 2025 - May 2026)*

SOFTWARE ENGINEER — Boulder, CO

- Implemented computer vision and autonomous navigation packages for the team's URC rover using ROS2 and OpenCV.
